Office Action Summary	Application No. 09/284,339	Applicant(s) TAKAYAMA, HISASHI	
	Examiner Lynda Jasmin	Art Unit 3627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Amendment received on December 9, 2005 has been acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 233 and 236 are rejected under 35 U.S.C. 102(b) as being anticipated by Fox et al. (5,790,677).

Fox et al. discloses an electronic commerce system having at least a mobile user terminal (via computing units 24 (a-c) embodied in servers, PCs, laptops, notebooks, etc and/or user 178), a service providing system (via cryptographic service provider CSP 174), and an examination terminal (via computer server 28 at a certified trusted authority 26 and/or credential binding authority), a mobile user terminal (at user terminal) makes a request for a purchase of electronic value card information (via CAPI layer 172 'acquiring a context associated with the appropriate CSP), the service providing system in response generates electronic value card information having key data for use in a mutual authentication process executed between the mobile user terminal and the examination terminal (col. 17, lines 46-59). Fox further discloses transmitting to the examination terminal a message that certifies use of the electronic

value card information and that is electronically signed with the key data (col. 19, lines 18-24).

4. Applicant is further reminded that functional recitation(s) using the word “for” (e.g. “for use in a mutual ...”) have been considered but are given little patentable weight¹ because they fail to add any structural limitations and are thereby regarded as intended use language. A recitation of the intended use of the claimed product must result in a structural difference between the claimed product and the prior art in order to patentably distinguish the claimed product from the prior art. If the prior art structure is capable of performing the intended use, then it reads on the claimed limitation. *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) (“The manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself.”); *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). See also MPEP §§ 2114 and 2115. Unless expressly noted otherwise by the Examiner, the claim interpretation principles in this paragraph apply to all examined claims currently pending. If Applicant(s) desire to give the phrase greater patentable weight, the Examiner respectfully recommends Applicant(s) remove “for” from the phrase where intended use is not desired. Like always, such amendments must not constitute new matter and must be supported in Applicant(s)’ specification.

¹ See e.g. *In re Gulack*, 703 F.2d 1381, 217 USPQ 401, 404 (Fed. Cir. 1983)(stating that although all limitations must be considered, not all limitations are entitled to patentable weight.).

Response to Arguments

5. Applicant's arguments with respect to claims 233 and 236 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takami et al and Keathley et al. are cited as art of interest for disclosing transfer of electronic value.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
